

EIE-Surveyor

Project Nr. 225997-CP-1-2005-1-FR-ERASMUS-TNPP
Project funded by the European Commission (SOCRATES Thematic Network)

York, Thursday, 04 December 2008

Dear Colleague

It gives me great pleasure to bring to your attention the final outcomes of the European Union funded EIE-Surveyor project (<http://www.eie-surveyor.org>), Project Nr. 225997-CP-1-2005-1-FR-ERASMUS-TNPP. The project was a Thematic Network project, which ran from 2005 to 2008 under the auspices of the European Association for Education in Electrical and Information Engineering (EAEIE, <http://www.eaeie.org>).

By way of a brief introduction, the EAEIE is dedicated to supporting educators across the breadth and depth of the Electrical and Information Engineering disciplines. The EAEIE has successfully completed Thematic Network projects of direct relevance to education in our Electrical and Information Engineering disciplines for the past 12 years, the EIE-Surveyor project being the most recent.

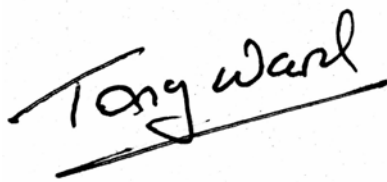

The primary objectives of the EIE-Surveyor project are to report on:

- The alignment of the generic and subject-specific competences within the Higher Education provision in Electrical and Information Engineering (EIE) across Europe
- Implementation of quality assessment methodologies in EIE
- Accreditation methodologies to enhance comparability and common certification procedures of Higher Education provision across Europe
- A census of the existing curricula in EIE in Europe, the multinational degrees, and the current position of the implementation of the Bologna-process in EIE, at the bachelor, master and PhD levels

I hope you will find some of these of interest. Full copies of all EIE-Surveyor project outcomes are available from the project website which can be accessed from the EAEIE website. If you have any questions or comments I would be delighted to hear from you.

In closing, the EAEIE is committed to the support of educators in EIE across Europe and we will continue to strive to provide a voice across Europe in this area. I would like to cordially invite you to take a look at our web site and consider engaging with our annual conference and to be aware of our new Thematic Network project ELLEIEC or "Enhancing Lifelong Learning in the Electrical and Information Engineering Community". Details of our new project can be found on our website (<http://www.eaeie.org>).

Best wishes

Tony Ward
